

Homework 5 - Due Thu Oct. 4th Math 224 - Fall 2007

Dr. Mauro Maggioni

Office: 293 Physics Bldg.

Phone: 660-2825

Web page: www.math.duke.edu/~mauro

E-mail: mauro.maggioni at duke

A written solution and hardcopy of every code, input or output must be submitted for each problem. An electronic copy of our code must also be submitted to me via e-mail, in a unique zip or tar/gzip file, named <FirstnameFamilyname>. Requests for extensions on homework should be done before the due date; unexcused late assignments will be penalized. You are encouraged to discuss the homework problems with your classmates, but your final submission must be entirely based on your own independent work (see the Duke Community Standard).

I suggest you look at as many review questions as you can, beyond those just required for the homework. In particular, in view of the test, you may want to review the past homework and do more exercises from the previous chapters. This homework set will be particularly light because of this. From Chapter 3 of the textbook:

Review questions

Answer, with full motivation for your answer, the review questions 3.36, 3.38, 3.41, 3.43.

Exercises

3.28, 3.34

Computer Problems

3.12.

Exercises with (*) are non-mandatory, but will give you extra credit.
